

HELPING ND SCHOOL DISTRICTS PREPARE STUDENTS TO BE CHOICE-READY

Essential Skills:

Choice-ready requirements, with which CDE can help: Earn a high school diploma; complete an online course

How CDE can assist: We offer an entire high school program per NDCC 15.1-21-02.2, including a diploma option, all delivered asynchronously online. Courses include physical education and a wide variety of options within subject areas like social studies, the sciences, and career and technical education (CTE). CDE is accredited by Cognia, and our courses align with national standards.

Post-Secondary Ready:

Choice-ready requirements, with which CDE can help: Dual credit courses, Algebra II, foreign language courses

How CDE can assist: Through an MOU with Mayville State University, CDE offers dual credit in English, science, math, social studies, education, and psychology. These courses are all delivered online each semester, helping students also meet an essential skill! CDE has a wide range of foreign language choices and offers Algebra II--all asynchronously online to help busy students fit these requirements into their schedules.

Workforce Ready:

Choice-ready requirements, with which CDE can help: Three or more CTE courses, dual credit courses, fine arts courses, some work-based learning experiences

How CDE can assist: With nearly 100 different asynchronous online CTE courses, CDE can help your students hone their career interests on a schedule that works for them. A few of our courses, such as our veterinary science, require students to engage in work-based learning. Courses in the fine arts allow students to learn an instrument or study art. Dual credit options are described under the post-secondary ready section.

Military Ready:

Choice-ready requirements, with which CDE can help: Physical fitness, two or more additional indicators from post-secondary or workforce options

How CDE can assist: As referenced above, CDE offers physical education courses to high school students; to help students prepare for a military career, under our menu of CTE options, we offer engineering, aerospace, and drone operation courses.
